RPL | Mature Age Exemptions | USAf International Students | One module outstanding from a Higher Certificate

## Curriculum Outline

The curriculum is designed to provide students with a structured progression through core disciplines, fostering both theoretical understanding and applied competence across key areas of study.

The core disciplines included in this programme are:

Modules	Module Purpose
Strategic Brand Communication	These modules introduce students to the essential concepts and principles behind developing an integrated strategic brand communication plan. In the first year, students build a strong foundation by exploring brand-building concepts, marketing communications, storytelling, creating brand value, and understanding communication as a whole. The second year focuses on the core components required to design a marketing and communication campaign. In the final year, students sharpen their skills by creating and analysing communication, while gaining insight into the dynamics of the brand communication industry. Together, these modules prepare students to confidently develop a complete strategic brand communication plan.
Brand Activation and Brand Challenge	This module applies the theories of strategic brand management and communication to answer real-life client briefs. The focus is on the development and crafting of an innovative brand building strategy and plan that will address complex business and societal challenges. Students will implement brand research to investigate situational, environmental, and commercial scenarios. They will derive consumer insights to drive the execution of original and meaningful solutions to multi-faceted brand challenges. Students work in teams to address real-life working challenges; develop their skills in building and recommending brand solutions; and collaborate with peers in a process of innovative problem solving.
Innovation Foundations	These modules equip students with the mindset, skills, and strategic insight to drive innovation from concept to implementation. Beginning with the fundamentals of creative thinking, problem-solving, and Design Thinking, students learn to identify opportunities and generate impactful ideas. They then explore how innovation operates within organisations, understanding both the cultural and leadership factors that enable it. Finally, they apply these principles to design, prototype, and evaluate sustainable, value-driven brand and business solutions, preparing them to lead and manage innovation effectively in real-world contexts.
